

Product Datasheet

Product Name	S100A11 Human Recombinant
Cata No	CB501006
Source	<i>Escherichia Coli.</i>
Synonyms	Protein S100-A11, S100 calcium-binding protein A11, Calgizzarin, MLN 70, S100A11, MLN70, S100C.

Description

S100A11 is a member of the S100 family of proteins which contains two EF-hand calcium-binding motifs and is thought to be involved in the regulation of a number of cellular processes including cell cycle progression and differentiation. S100A11 may function in motility, invasion and tubulin polymerisation. S100 proteins are localized either in the cytoplasm or the nucleus of a wide range of cells. There are at least 13 members in the S100 gene family, which are located as a cluster on chromosome 1q21. Chromosomal rearrangements and altered expression of S100A11 have been implicated in tumor metastasis. S100A11 Human Recombinant is expressed in E. coli having a molecular weight of 17kDa fused to an amino terminal hexahistidine tag.

Purity

Greater than 95% as determined by SDS-PAGE. 2 bands on Western blot at 17 and 34 kDa, respectively representing monomeric and dimeric form.

Formulation

S100-A11 is supplied in PBS / 50% glycerol.

Applications

S100A11 can be used directly as a positive control in Western blotting, ELISA, immunoprecipitation and other immunological experiments. The biological activity of this product has not yet been tested.
